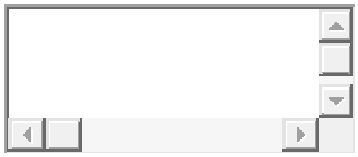
---

5 Optional Extra Test Cases

- Try **wrong login** for both company/student.
- Apply for **multiple internships** as the same student.
- Try **resending OTP** during registration or verification.
- Delete an internship and see if the applications disappear.
- Test **responsive menu** and profile uploads.

If you want, I can also **prepare a ready-to-import SQL/CSV file** with all these users, internships, and applications so you can quickly load them into your database and start testing.


Do you want me to do that?
